PROFILE

AI & ML undergraduate focused on building practical software and AI-driven products. Hands-on exposure to Python, C++, Java, web development, REST APIs, Generative AI, AI agents, data analytics and cloud fundamentals. Demonstrated initiative through industry job simulations, technical projects and Hack2026 participation.

EDUCATION

Parul University, Vadodara — B.Tech CSE (AI & ML)
B.Tech — Computer Science & Engineering (Artificial Intelligence & Machine Learning)

TECHNICAL SKILLS

Programming: Python, C++, Java, JavaScript / TypeScript

Web: HTML, CSS, Front-End Development, REST APIs

AI / Data: Artificial Intelligence, Generative AI, AI Agents, Data Analytics

Engineering: OOP, DSA, Software Engineering, Git / GitHub, Testing

Cloud / Platforms: AWS, NVIDIA Jetson Nano, Dash

SELECTED PROJECTS

Reels Hub — Short-form video platform concept with separate user/admin workflows, content management and monetization-oriented features.

Nexus Mirror — Windows-based mobile mirroring project focused on connecting a phone to a PC for screen interaction and control.

Jarvis Personal Assistant — Python assistant concept combining voice input/output with desktop automation and computer interaction.

FedHealthGuard — Federated-learning AI/ML concept for privacy-preserving healthcare-oriented multimodal data processing.

SELECTED CERTIFICATIONS

Google: AI Fundamentals — Coursera (Apr 2026)

Meta: Introduction to Front-End Development — Coursera (Apr 2026)

NVIDIA: Getting Started with AI on Jetson Nano (Aug 2025)

AWS: Chalk Talks — Generative AI on AWS (Aug 2025)

Simplilearn: AI Agents for Beginners (Aug 2025)

Forage: Software Engineering, GenAI, Cyber, Solutions Architecture & Data Analytics simulations (2025–26)

ACHIEVEMENTS & ACTIVITIES

- AI Skill Event: Hackathon (Hack2026), Parul University — participated March 2026.
- Completed practical industry simulations covering REST APIs, Kafka/H2 integration, cloud architecture, GenAI, cybersecurity and AI-driven data analytics.
