KAPIL KUMAR

AI/ML & Software Developer

Vadodara, India | +91 6350050794 | kapilkumar.ai.dev@gmail.com
GitHub: github.com/sniperlordhumai-debug | LinkedIn: linkedin.com/in/kapil-kumar-931330375

SUMMARY

AI/ML & software developer and B.Tech CSE (AI & ML) undergraduate at Parul University. Builds practical software and AI-driven products with Python, TypeScript, Generative AI, AI agents and REST APIs — proven through industry simulations, 16+ certifications and Hack2026.

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, TypeScript, HTML, CSS

AI / ML: Artificial Intelligence, Generative AI, AI Agents, Machine Learning, Data Analytics

Web / APIs: React, Next.js, REST APIs, Front-End Development

Engineering: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Software Engineering, Testing

Cloud / Tools: AWS, NVIDIA Jetson Nano, Git, GitHub, Dash, Agile, CI/CD fundamentals

PROJECTS

Reels Hub — TypeScript, Web Development, Front-End, Backend Architecture

- Designed a short-form video platform concept with separate user/admin workflows, content management and monetization-oriented features.
- Planned full-stack architecture for content, moderation and monetization flows.

Jarvis Personal Assistant — Python, Speech Processing, Automation, AI

- Built a Python assistant combining voice input/output, speech processing and desktop automation.
- Built an audio-to-action pipeline: speech recognition, intent handling, automation.

FedHealthGuard — AI, Machine Learning, Federated Learning

- Explored privacy-preserving federated learning applied to multimodal healthcare data.
- Designed a local-training / model-update pipeline that keeps sensitive data on-device.

Nexus Mirror — Windows, Mobile, System Integration

- Engineered a Windows-based mobile mirroring concept for screen interaction and control between a phone and a PC.

EDUCATION

Parul University, Vadodara **Expected 2029**
B.Tech — Computer Science & Engineering (Artificial Intelligence & Machine Learning)

Senior Secondary (Class 12) — CBSE Science stream

Secondary (Class 10) — CBSE

CERTIFICATIONS

- Google — AI Fundamentals (Coursera, 2026)
- Meta — Introduction to Front-End Development (Coursera, 2026)
- Microsoft — Introduction to Computers (Coursera, 2026)
- NVIDIA — Getting Started with AI on Jetson Nano (2025)
- AWS — Chalk Talks: Generative AI on AWS (2025)
- Simplilearn — AI Agents for Beginners (2025)
- Forage — Software Engineering, GenAI, Cyber, Solutions Architecture & Data Analytics simulations

ACHIEVEMENTS & ACTIVITIES

- AI Skill Event: Hackathon (Hack2026), Parul University — competed in a 3.5-hour technical build, March 2026.
- Completed 6+ industry job simulations covering REST APIs, Kafka/H2 integration, cloud architecture, Generative AI, cybersecurity and AI-driven data analytics.
